

Can you stop the bleed?

▶  **2-4 minutes**
That's how quickly a person with massive hemorrhage can bleed out.

▶  **60%**
of fatalities could be prevented with basic hemorrhage control techniques.

▶  **0** liability for providing lifesaving care to a victim in an emergency according to Good Samaritan Laws.

▶ **3** hours is all it takes to receive Emergency Medical Training that prepares you to save a life.

▶  You can't put a price on a life. Consider the *value* of effective training and the *cost* of ineffective training.

Make sure your Bleeding Control Kit contains these lifesaving tools, and know how to use them!
